c/ for subclass "broadcasts on public and commercial cable televisions with national and regional coverage" – according to a summary report, including the reports submitted by each television for each calendar year, as follows: 2016, 2018 and 2019, based on the average value per minute duration of each work used for the entire period (average airplay) and after eliminating:

The allocation shall be made for each television separately, based on the amounts paid by it for the entire period for this class.

The amounts related to the dropped reports for both subclasses under letter "B" and letter "C" shall be distributed in total on the already processed media reports of the respective subclass, based on the average value per minute duration of each used work for the whole period (average airplay).

(2) For film music in sub-class "broadcasts on public and commercial cable televisions with national and regional coverage" for the periods 2015 – 2017 and 2018 – 2020, the allocation shall be made on the basis of two summary reports – one for each of the two periods, including the reports submitted by each television for the respective period, when determining a relative share /distribution threshold/ of BGN 7 for broadcasting a film and when determining a representative for each of the two periods program report of a television program.

The amounts of the groups of televisions that shall fall below the above threshold are distributed in total on selected three-year consolidated reports of televisions, whose data are representative of the broadcast repertoire in each of the groups of televisions, whose reports have been dropped.

(3) The allocation of the amounts paid for public and private terrestrial programs in the period 2015-2017, including the film music used by them, is made on the basis of the reports submitted by the respective media for each year, based on the average value per minute duration of each work used for the entire period (average airplay).
